

## Videoconferencing Display Mode

**Lecture Mode View** – The host site sees all the sites and all the guest sites see **only** the host site. \*

**Auto Lecture Mode View** – The speaker sees all the sites and the guest sites see **only** the speaker site. \*

**Continuous Presence View** – Each site sees all of the sites during the conference.

**Improved Continuous Presence View** - Each site sees all of the sites during the conference. The speaker is in an enlarged square.

**Voice Activated View** – The site which has the floor sees the last site to have it. The other sites see the site that has the floor until another site takes the floor.

\*This Mode is not supported in IRIS at this time. Contact us to have your videoconference changed to this mode.
